

**1) Roll call and opening**

Tolonen told that this is first meeting of new way to work in commission. Operations, Legislation and CBRN Groups are history since this meeting.

- I. Tolonen, J Abrantes, B Hrepnevik, D Ragkavas, G Carlson, M. Starcevic (H Schreurs watching and listening quietly as he promised)

**2) Minutes of the last meeting France 2014**

Accepted

**3) Flammable liquids in the shops and department stores/malls**

The group discussed the “material” sent by delegates. Poland and Greece promised to send more material to Ilpo. Ilpo will make a comparison of the materials given to him for the next meeting.

**4) LNG**

The group got the film sent by Watering friday 22.5.2015  
( <https://www.youtube.com/watch?v=BtP2JrpB5IY> ).

The film is very useful for every country. It helps to understand the properties and dangers of the leak of LNG.

Here are considerations: Infrared camera, wind sock that shows in which direction gas cloud is going, enough big collecting pools/tank for LNG leaks, stationary gas monitoring, alternative methods to pump leaked LNG back to a safe tank etc. Personal protection is very important for workers and first responders

In future the commission should develop LNG and hydrogen guidelines for gas stations accidents for first responders.
